FOR IMMEDIATE RELEASE

VersaLogic releases Android Demo / Eval Kit

Tualatin, OR – February 4, 2019 – VersaLogic Corp., the embedded industry’s most trusted computer company, has announced its new Android Eval Kit.

Evaluation made easy

VersaLogic’s new Android Eval Kit provides an easy way to evaluate Arm®/Android performance for rapid design and application development. It includes everything needed to run the Android OS on a high-reliability embedded system, including a stand-alone Arm-based computer board, and a touch-screen display. No additional carrier cards, companion boards, or other add-ons are needed. The Android Eval Kit is designed to save start-up time and allow the user to focus on their product development.

Ready to use

The VersaLogic Android Eval Kit is shipped with a complete Android OS image allowing users to start their evaluation within minutes of opening the box.

“Set-up was a breeze, it was up and running in less than 10 min.” – Electronics Technician

The kit includes:

- Tetra Single Board Computer (SBC) with Quad-core i.MX6
- 7” 1024 x 600 HDMI Touch-screen flat panel display
- Pre-loaded Android (Oreo 8.0) on MicroSD card
- Wall power adapter
- USB Hub
- Start-up guide
- Required cables

Industrial Tough

VersaLogic provides a high reliability embedded platform for Android-based solution development. VersaLogic SBCs are engineered and validated for unforgiving environments. They are designed and tested for industrial temperature (-40° to +85°C) operation and meet MIL-STD-202 specifications for impact and vibration. Every component is carefully selected to ensure reliable operation in the field.

Long-term Availability

VersaLogic single board computers are designed for long-term availability (10+ year typical production lifecycle).

Pricing and Availability

The Android Eval Kit (P/N: VL-EVK-ARM-AND1) is available from both VersaLogic and Digi-Key Corporation for \$599. Contact Sales@VersaLogic.com or visit VersaLogic.com or Digikey.com for more information.
