FOR IMMEDIATE RELEASE

VersaLogic “Zebra” named a top 10 SBC of 2018!

Tualatin, OR — September 20, 2018 — VersaLogic Corp., a leading supplier of embedded computers, today announced it has been recognized by EETimes.com for its new “Zebra” board as one of the top Single Board Computers of 2018! VersaLogic’s newest Arm-based Zebra board stood out as a rugged, feature rich, USA-supported solution for applications in harsher environments. Read the full article here: https://www.eetimes.com/document.asp?doc_id=1333687&page_number=4.

“Every year like clockwork, new breeds of single board computers (SBCs) and the latest revisions of our favorite boards hit the market with makers, engineers, and IT professionals alike scrambling to get their hands on them to build projects around the new feature sets they bring,” writes Cabe Atwell, EETimes.com contributor. “This top 10 roundup focuses on mainstream SBCs that hobbyists, makers, and engineers can use for any number of projects whether they’re newcomers to the community or 30-year IT veterans.”

Ready to use

The Zebra extends VersaLogic’s Arm-based embedded computer line as a rugged, economical embedded computer with low power draw. The production-ready, 95x95 mm board typically draws less than 3 watts. It is footprint compatible with COM-Express Compact sized boards, which means that it can be easily swapped out with similar sized boards. Available with either a DualLite or Solo iMX6 processor, Zebra includes soldered-on memory, -40° to +85°C operation, MIL-STD-202G shock and vibrate, long-term availability, and customizable I/O. Unlike other Arm-based processor modules, the Zebra is a complete single board computer, ready to turn on and run.

Extended Life

VersaLogic understands the needs of OEMs catering to multiple applications from medical to military. Designed with careful component choices, and long product life in mind, Zebra addresses the challenges of short product lifecycles. VersaLogic’s 10+ year life-extension programs offers long production cycles free from expensive migration changes and upgrades.

Pricing and Availability

Zebra product versions, part number VL-EPC-2701xxx, are in stock at both VersaLogic Corp. and Digi-Key Corp. with OEM pricing starting at \$168. Contact Sales@VersaLogic.com or visit VersaLogic.com/Zebra or Digikey.com for more information.

About EETimes.com

The voice of the electronics industry for almost 40 years, EETimes.com is the largest independent engineering resource for design engineers, design managers, technologists and business leaders, offering news analysis and opinion on the technology and business issues that shape their world.

About VersaLogic Corporation

VersaLogic delivers state-of-the-art embedded computers, coupled with expert technical support, for critical markets such as medical and defense. Featuring long-term availability, -40° to +85°C operation, MIL-STD-202G shock and vibration testing, and outstanding US-based support, VersaLogic products are ideal for critical applications that value ruggedness, reliability and long life. A 40+ year history of consistency has earned VersaLogic the reputation of being “the industry’s most trusted embedded computer company.” For more information, visit VersaLogic.com.
